About Me

I am a final-year B.Tech student specializing in Artificial Intelligence and Data Science, with strong skills in Python, SQL, FastAPI, and Generative AI. I have hands-on experience building AI-powered applications using LLMs, RAG, AI agents, REST APIs, and computer vision.

I enjoy solving real-world problems by combining software engineering with AI technologies. I am focused on building scalable, practical, and user-oriented AI applications.

Key Highlights * **AI Application Development:** Built AI-powered applications using Python, FastAPI, LLMs, RAG, AI agents, and API integration. * **AURA - Final-Year AI Project:** Developed a multimodal AI assistant integrating conversational AI, voice interaction, computer vision, and virtual-human interaction.

CGPA: 9.36/10

Core Skills Python, SQL, FastAPI, REST APIs, Generative AI, LLMs, RAG, AI Agents, Computer Vision, OOP, Data Structures & Algorithms, Problem Solving

Tools I Work With Python, FastAPI, Pydantic, Git/GitHub, VS Code, Jupyter Notebook, Whisper, YOLO/Ultralytics, LLM APIs

Hiring Manager Cognizant Chennai

Dear Hiring Manager,

Re: Application for the position of AI Application Developer

I am writing to apply for the AI Application Developer position at your company. As a final-year B.Tech student specializing in Artificial Intelligence and Data Science, I have developed a strong foundation in Python, SQL, backend development, and Generative AI, along with hands-on experience building practical AI-powered applications.

My major project, AURA, is a multimodal AI assistant that integrates conversational AI, voice interaction, computer vision, and virtual-human interaction. I developed the application using technologies including Python, FastAPI, Whisper, YOLO, text-to-speech, and AI model integration. This project gave me practical experience in connecting different AI components with backend services to create a complete application.

I have also developed backend applications using FastAPI and REST APIs, gaining experience with routing,

request handling, Pydantic, data validation, and application architecture. In addition, I have worked with Generative AI concepts including LLMs, RAG, AI agents, prompt engineering, and API integration.

I enjoy solving real-world problems through software and AI and have a strong interest in building reliable, practical, and user-focused AI applications. I would welcome the opportunity to contribute my technical skills and continue developing as part of your team.

Thank you for considering my application. I have enclosed my CV for your reference and would be pleased to discuss my qualifications further.

Yours sincerely, Rishik

Resume

RISHIK REDDY PALUKURU rishikreddypalukuru@gmail.com | +91 6302535730 | Chennai, India

PROFESSIONAL SUMMARY Computer Science and Engineering undergraduate specializing in AI, with hands-on experience building a machine learning model during an industry internship. Skilled in Python, SQL, and full-stack development, with a strong foundation in data structures and cloud basics. Seeking an entry-level Machine Learning / Software Development role to apply and grow these skills.

PROFESSIONAL EXPERIENCE

Machine Learning Intern - Shiash Info Solutions Pvt Ltd (August 2024 - November 2024) *3-Month Internship* * Contributed to the Urban Insights machine learning project by developing AI-based solutions using Python. * Performed data preprocessing, feature engineering, model training, and performance evaluation to improve prediction accuracy. * Analyzed datasets and generated meaningful insights through visualization to support data-driven decision-making.

Machine Learning Intern - HDLC Technologies, Chennai (May 2023 - June 2023) *Domain: Machine Learning* * Built a handwritten digit recognition system, training and evaluating a machine learning model to classify digit images with high accuracy. * Worked with real-world image datasets, applying preprocessing and model evaluation techniques under the guidance of the technical team. * Gained practical exposure to the end-to-end ML workflow: data preparation, model training, testing, and performance analysis.

PROJECTS

Restaurant Management System (September 2024) *Python, Flask, HTML, CSS, JavaScript, MySQL.* * Built a web application to digitize restaurant operations, solving the problem of manual, error-prone order and billing tracking for small restaurants. * Designed RESTful APIs backed by a MySQL database, enabling reliable, real-time management of menus, orders, customers, and billing.

LexAI - AI Chatbot & Dataset Analyzer (October 2023) *Python, Flask, REST APIs, Pandas, HTML, CSS, JavaScript* * Built an AI chatbot to give users instant, conversational answers instead of manually searching for information. * Developed a dataset analysis module that automatically generates insights, summaries, and visual reports from uploaded data, cutting down manual analysis time.

SKILLS & TOOLS * **Programming:** Python, SQL, HTML, CSS, JavaScript * **Machine Learning:** Model training & evaluation, handwritten digit recognition (CNN basics), Pandas, NumPy * **Databases:** MySQL, SQL, relational database design * **Tools & Cloud:** VS Code, PyCharm, Jupyter Notebook, Git/GitHub, AWS S3 basics * **CS Core:** Object-Oriented Programming, Data Structures & Algorithms (basic), SDLC, debugging

ACHIEVEMENTS & CERTIFICATIONS * Python for Data Science - Certification * Python (Skill Certification) - HackerRank * SQL (Skill Certification) - HackerRank

EDUCATION * **B.Tech. Computer Science and Engineering** (Expected 2027) Hindustan University, Chennai, Tamil Nadu * **Class XII, State Board** (2023) Narayana Educational Institution, Nellore, Andhra Pradesh * **Class X, State Board** (2021) Modern English Medium School, Nellore, Andhra Pradesh
